

FEATURES & BENEFITS

- Completely Customized Panels
- Wide Range of Connector Punches Available
- Can Be Ordered Blank, Preloaded with Connectors or Prewired/Harnessed
- Aluminum, Steel or Stainless Steel
- Flat, Flanged, or Chassis Configurations
- Engraved, Laser Etched or Silk Screened

From wall plates to custom rack-mountable chassis, Gepco can design and manufacture almost any type of custom panel for commercial AV or residential applications. Gepco® Brand panels are custom-made to user specifications in flat, flanged or chassis configurations and can be ordered blank, preloaded with connectors or prewired/harnessed with cable to simplify installation. Panels can be fabricated from aluminum, steel, or stainless steel in a variety of colors, paint, or anodized finishes. Connector punches can be made for a complete range of broadcast and professional AV connector formats. Engraving, laser etching and custom silk-screening options finish off the complete customized interface solution for your venue or facility.
